

## SNAP Guidebook

SNAP improves reproduction quality in newsprint production and provides guidelines for the exchange of information. These specifications pertain to proofing and coldset (sometimes referred to as "non-heatset") printing for all newsprint production on webs of paper, including offset lithography, direct lithography, letterpress and flexography for a wide variety of products. SNAP is not intended for magazine, catalog, packaging, or direct mail printing, nor is it intended for sheetfed, gravure or heatset web offset processes.

For further information, please contact Harshad Matalia at (703) 902-1852 or [matah@naa.org](mailto:matah@naa.org).

### **Item #70100**
